The W29 Huracán has been developed as a modern looking Sport Cruiser combining a spacious, safe, and social cockpit with a fantastic design language creating a unique appearance that radiates both luxury and sportiness.

This versatile new model can be powered with either Volvo Penta or Yanmar inboard engines. Both these motorizations together with the legendary deep V WINDY hull secures the trademark top notch performance and seakeeping. However, our UK models will be coming with the Volvo Penta Diesel D6 440 DPI engine.

WINDY also continue their collaboration with Design Unlimited who have designed the new Sports Series interiors debuting first with the new Camira and now with the new HURACÁN.

Windy 29 Huracán in pictures is the World Premiere model on show at Boot Dusseldorf 2024. Different engine options, upholstery and teak colour options are different to that seen in the pictures.
